

SCANMENOW FOR SECURITY

Confidence begins with visibility

ScanMeNow captures **ultra-accurate 3D** records of every entrant in seconds. This enables securityteams to maintain clear, **up-to-date visual data** for identification and incident response — delivering visibility and confidence when it matters most.

How?

With native portable **AI** pipeline: The first and only field-ready system capable of generating 3D data **directly on-site.**

Our Services:

> Quick & Reliable

Capture in under 2 seconds — built for high-throughput security

> Accurate & Realistic

Captures ultra-fine detail and complex surfaces in 3D with AI

> Lightweight Data

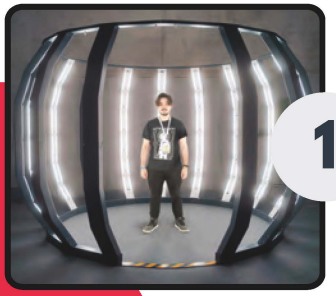
~5 MB files for easy storage, transfer, and instant viewing wihtout quality compromise

> Portable & Scalable

Modular frame assembles anywhere in under an hour

> Effortless Operation

Single trigger. Full automation. Zero hassle.



1

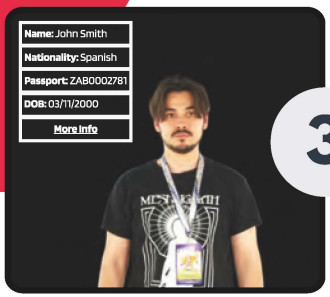
Capture

Instant, contactless 3D capture using 100+ synchronized cameras — creating a full-body digital twin in seconds.

2

Store

Lightweight (~5 MB) scans are securely stored and linked to identity records for rapid retrieval.



3

Identify

Investigators can **compare live or recorded footage** with precise & recent 3D records to confirm identities quickly

Use Cases

Digital twin creation
For border entry monitoring

Corporate security
For employee and visitor verification

Event Security
Pre-entry 3D logging, visual crowd management

Screening solutions
To enhance VIP security

Law Enforcement
Forensic-grade capture of suspects or witnesses

Digital records
Of all entrants for correctional facilities
